Company Intro

Planet Boat was established in 2018 to specifically build polyethylene workboats, being incorporated within Engin & Dortler shipyard which has 40 years of experience in ship building and ship repair in Tuzla / Istanbul / Turkey.

Planet Boat had its own legal entity by 2019 and set it's main principle as "completing customer specific design projects" and ready to present the best engineering solutions with latest technologies and innovations for workboats such as: pilot, service, agency, police, patrol, ambulance and also military boats.

Planet Boat has over 30 team members, experienced in polyethylene workboat production, capable of manufacturing HDPE Boats ranging from 5 to 24 meters, and achieved successful deliveries of several boats yearly with the purpose of making polyethylene boat production a reliable investment zone in Turkey and all over the world.

Workshop Facilities

Planet Boat workshop has an area of 500 meters with all needed machines for in-house fabrication: CNC router , Sheets Butt welding machine, Extruder / Air welding machines and all types of power / hand tools to enable our experienced team to innovate.
